

Filter the events displayed in Industrial HiVision

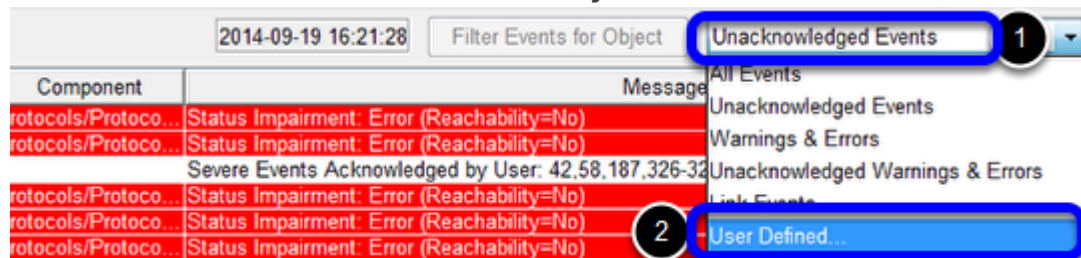

- 2018-02-21 - Industrial HiVision

In this lesson we will see how to acknowledge only a subset of all the events recorded by Industrial HiVision (IHV).

Pre-requisite: IHV is successfully installed and a project is populated.

Let's now suppose we want to filter out all the events coming from 192.168.1.40.

Create a user defined filter to see only the relevant entries (1 of 2)

By default, IHV shows the unacknowledged events.

We need first to create a filter to highlight only the events coming from 192.168.1.40. To do this, click in the dropdown menu and select 'User Defined'.

Create a user defined filter to see only the relevant entries (2 of 2)

The 'User Defined...' dialog box contains the following fields:

- ID: in
- Ack.: = No
- Type: Worse Than - All -
- Category: = - All -
- Time: After
- User: =
- Source: = 192.168.1.40 (highlighted with a blue box and a red circle with the number 1)
- Component: =
- Message: =

At the bottom, there are three buttons: OK (highlighted with a blue box and a red circle with the number 2), Cancel, and Help.

Type as 'Source' the ip you want to filter out and click ok

Acknowledge all the filtered events

Filter Ack. = 'No', Source = '192.168.1.40' 2014-09-19 16:27:19

Right-click context menu options: Acknowledge, Acknowledge All

Now that you have all the relevant events, go in the Event List and press Ctrl+A and then right click, 'Acknowledge all'

Back to 'Unacknowledged Event'

Component	Message
	Severe Events Acknowledged by User: 43,57,65,184,264,324,393,395
Protocols/Protoco...	Status Impairment: Error (Reachability=No)
Protocols/Protoco...	Status Impairment: Error (Reachability=No)
	Severe Events Acknowledged by User: 42,58,187,326-327,388-389
Protocols/Protoco...	Status Impairment: Error (Reachability=No)
Protocols/Protoco...	Status Impairment: Error (Reachability=No)
Protocols/Protoco...	Status Impairment: Error (Reachability=No)

Switch back to 'Unacknowledged Event' to show all the events except the ones related to 192.168.1.40. Please notice that you will see an entry in the events saying that multiple events have been acknowledged.

Please notice that the events cannot be deleted from an IHV project.
